CANADIAN VALLEY ELECTRICAL

Electricity is an unforgiving element, and that is why CVEC puts such a priority on electrical safety education. We hold regular safety meetings for our employees and staff, and equip our line and service personnel with gear to keep them safe.

We feel it is important to educate the public, as well. It's never too soon to start teaching young people how to live safely around electricity, so we go into area schools to share safety information with students.

On November 18, CVEC Director of Safety and Loss Control Jesse Murray, head of our Construction Department Chris Speers, and Communications Coordinator Kaci Jarvis visited the 5th grade class at Strother Schools.

They visited with the students and teachers about electricity, and safety practices, along with showing them some of the equipment CVEC linemen use to be safe.

They also shared info on electric cooperatives, particularly CVEC and its history.

Jarvis says the students were great, adding "It was exciting to be able to be back in the schools again!"

Jesse Murray (above) demonstrates how a hot stick allows CVEC linemen to work electric lines safely.

Chris Speers dons rubber sleeves and gloves while Murray explains how they keep linemen safe when working around electric lines that are 'hot.'

IN CASE OF TROUBLE

1. Check for blown fuse or tripped circuit breakers.
2. Check with your neighbors. Ask if their electricity is off and if they have reported it.
3. If not, call the office or download the Smarthub app to report the trouble.

Recognized Nationally for Phenomenal Subscriber Growth

CVEC Fiber was recognized recently in *The Beacon*, a national publication, written by Naylor Gray Area Vice President Product Marketing of Calix. The article highlighted CVEC Fiber's phenomenal take rate of the CVEC Fiber mobile app.

The article boasts CVEC Fiber's astonishing 750% subscriber growth rate within three months of launching broadband. We were able to achieve phenomenal results through our marketing efforts and utilizing our field technicians to provide a multi-faceted approach to reach our membership.

First, CVEC Fiber got the word out by using email, social media, and various advertising methods to boost customer awareness. This was followed by CVEC Fiber field technicians providing a white glove installation. With every home 903390129 installation, our field technicians provide each subscriber a welcome package including CVEC Fiber merchandise, a quick start guide and hands on training of the CVEC Fiber app and its features.

By making our members aware of the features of the CVEC Fiber app, members are able to understand and utilize great features the app possesses, including ProtectIQ and ExperienceIQ.

ProtectIQ gives our subscribers an extra layer of protection that keeps their network safe by blocking viruses, malware, and malicious websites from all connected devices in their home. ExperienceIQ gives subscribers, more specifically parents, advanced control of their online experience, including the ability to set online time limits, block or time access to specific content, applications and websites, and view device usage information.

By having fast internet speeds, paired with the CVEC Fiber app, we

are able to see our motto – Improve Life, Serve Community – in action.

“A year ago, this was still a concept, and today we're live, with one of the fastest residential broadband networks in the country, right here in rural Oklahoma,” says CVEC Fiber General Manager Sheila Allgood. “Broadband is no longer ‘nice to have,’ but an essential service for our mem-

bers. With full alignment across our entire organization, we've been able to ramp up quickly, and we look forward to enhancing our subscribers' experience even further over the coming months and years.”

We are thankful to be able to serve our customers reliable, secure, and the fastest internet in Oklahoma!

Energy Efficiency Tip of the Month

Maximize your heating system's performance by inspecting, cleaning or replacing air filters once a month or as needed to reduce energy costs and prevent potential damage to your system.

Make sure radiators, baseboard heaters and warm-air registers aren't blocked so air can flow freely.
